

Zero-Ascend Omnispecies (ZAO) modular fish passage system

\$1.25 million collaborative award with U.S. Department of Energy Water Power Technologies Office (DE-EE0008969)

Timetable: November 2019 – present

Principal Investigators: D. Duquette & J. Bryan

Summary: Under the award, the team will develop a concept for low-cost, prefabricated multi-species upstream fish passage, and demonstrate significantly improved economics and efficacy over existing techniques.

Team members:

- LPS
- GZA GeoEnvironmental, Inc.
- Whooshh Innovations
- Alden Research Laboratory
